**Subject:** Freedom Industries Samples - Union Request for Information

Good Morning Skip:

I have reviewed all of the e-mails and materials provided to Rose Anshant in relation to Freedom Industries Sample “Odor” case. (cumulative record attached as a pdf)

Our response to the Union Requests For Information (RFI) is becoming time-critical.

The following information and documentation is still required to complete the Agency response to the Union’s request:

1) Copies of the MSDS’s for 1) Crude MCHM and 2) Crude PPH I thought that Cindy Caporale had already provided these to you, but I’ll include them again just in case. I don’t have any MSDS sheets for the crude products.

2) what are the safe levels of concentration for each contaminant identified, specific to the samples?  
(water, air, product, etc.)

**Ex. 5 - Deliberative**

## **Ex. 5 - Deliberative**

## **Ex. 5 - Deliberative**

3) All documentation relating to the two air samples (“grab” and 24-hour samples) taken by Hoang Nguyen, including the location(s) within the facility at which the two air samples conducted by Hoang Nguyen were taken.

Once again, I thought that that Cindy Caporale had already provided these to you, but I’ll include the file

I have again just in case.

4) did any bargaining unit members complain about health symptoms; if, yes, was any medical monitoring offered/provided. I received no complaints, requests, notifications or any other information about employee health concerns or symptoms during this issue.

Please call me as soon as possible to discuss/review this matter. Thanks.

Tony
